

For tired eyes / prevention of eye disease

# New Sante de U alfa

Red vitamin B<sub>12</sub> combination

## Features

Due to age or overuse, eye problems such as tiredness and blurred vision, itchiness, and dry eyes are commonly experienced.

New Sante de U alfa is a balanced combination of red vitamin B<sub>12</sub> to promote muscle activity which controls visual accommodation (ciliary muscles) and active ingredients such as chondroitin to protect and care the surface of the eye (cornea), exhibiting effectiveness against tired eyes and eye disease.

## Indications

Eye fatigue, prevention of eye disease (after swimming, after dust or sweat entering eye, etc.), blurry eye (increase in eye mucus, etc.), itchy eye, hyperaemia of conjunctiva, blepharitis (soreness of eyelid), ophthalmia due to light rays such as ultraviolet rays (snow ophthalmia, etc.), and discomfort while wearing hard contact lens.

## Dosage / Administration

Instill 1 to 3 drops at a time, 5 to 6 times daily.
