

For eye inflammation and fatigue

Sante PC[®]

Treatment for eye problems caused by PC and smartphone use

Features

The blue light that computer monitors and smartphone screens emit can be stressful for your eyes. Sante PC contains the maximum level* of vitamin B₁₂ for improvement of visual accommodation, chondroitin sulfate sodium for corneal protection, and vitamin B₆ for enhancement of tissue metabolism in damaged eyes. This product contains a total of eight ingredients that relieve eye inflammation and fatigue, thus keeping your eyes fresh. It is effective against eye fatigue in people who need to use computers or smartphones for a long time.

*Maximum concentrations in marketing license standards for nonprescription ophthalmic drugs : Vitamin B₁₂, Chondroitin sulfate sodium, Vitamin B₆

Indications

Ophthalmia due to light rays such as ultraviolet rays (snow ophthalmia, etc.), eye fatigue, hyperaemia of conjunctiva, prevention of eye disease (after swimming, after dust or sweat entering eye, etc.), blurry eye (increase in eye mucus, etc.), itchy eye, blepharitis (soreness of eyelid), and discomfort while wearing hard contact lens.

Dosage / Administration

Instill 1 to 3 drops at a time, 5 to 6 times daily.
